TV ANTENNA ROOF MOUNT REQUIREMENTS

TO ALL OWNERS:

The roof mounts for your unit are now in place. It is *IMPERATIVE* that they be used if you have a satellite dish or other equipment on the roof of your unit.

Contact your service provider immediately to have any necessary relocation done. We have purchased a strong and long lasting roofing system but there are requirements in place so that our WARRANTY will be honored and your investment protected. The CCV HOA Manager will be able to answer any questions that your provider might have regarding how/where the equipment should be mounted.

Any bricks and/or skids previously used to anchor equipment MUST be removed from the roof immediately. They present a potential hazard for creating a tear in the newly installed membrane.

Please notify the Manager (327-1005) when you have taken care of the necessary modifications on the roof of Unit _____.

Sincerely,

CCV HOA Board of Directors
